DETAILED ACTION

1. This is in response to the Applicant's arguments and Terminal Disclaimer filed on March 31, 2006 in which claims 1-32 are currently pending.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jeff Glabicki (Reg. No. 42584) on April 24, 2006.

3. The application has been amended as follows:

Claim 3, line 1, after "wherein the processing" please insert -- the request message --

Allowable Subject Matter

4. After a further search and thorough examination of the present application and in view of the applicant's arguments and Terminal Disclaimer, claims 1-32 are found to be in condition of allowance.
5. The following is an examiner's statement of reasons for allowance: the cited prior arts teach the fast dynamic channel allocation call admission control functions are responsible for efficiently allocating or changing the allocations of physical resources and interference level, but it is difficult to be reused by other RRM functions since the

main interface function is large and the inputs to the code allocation are dependent on the signal message.

On the other hand, the Applicant teaches a fast dynamic channel allocation call admission control algorithm comprising the steps of: a signal-independent code allocation process, including: checking the availability of a code set in the cell; generating timeslot sequences for the available timeslots; assigning a code set to the available timeslots in a timeslot sequence, wherein a successful assignment is a solution; calculating the interference signal code power (ISCP) for each solution; and selecting the solution having the lowest weighted ISCP as an optimal solution; and a post-code allocation process. These limitations, in conjunction with all limitations of the independent claims, have not been disclosed, taught, or made obvious over the prior art of record.

The Applicant further teaches retrieving a list of available timeslots and a list of code sets from the centralized database; allocating a code set to the available timeslots in a timeslot sequence; updating the new WTRU information with the new allocation information in the centralized database; and sending a response message with the results of the code allocation process. These limitations, in conjunction with all limitations of the independent claims, have not been disclosed, taught, or made obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
